Forms control: All endorsed training packages will have a version number displayed on the imprint page of every volume constituting that training package. Every training package will display an up-to-date copy of this modification history form, to be placed immediately after the contents page of the first volume of the training package. Comments on changes will only show sufficient detail to enable a user to identify the nature and location of the change. Changes to training packages will generally be batched at quarterly intervals. This modification history form will be included within any displayed sample of that training package and will constitute all detail available to identify changes.

Important

Training Packages are living documents. Changes are periodically made to reflect the latest industry practices.

As a user of the Training Package, and before commencing any form of training or assessment, you must ensure delivery is from the **current version**.

Ensure you are complying with this requirement by:

- checking the version identifier code of the version you currently have (located on the imprint page, just below the copyright statement)
- accessing the Australian Training Products (ATP) website and comparing the version identifier. This information is displayed in the first few pages of the Training Package.

Where the ATP website shows a different version, the Modification History, again shown on the ATP website in the first few pages of the Training Package, will display the changes made in versions. ATP website for version comparison: <http://www.atpl.net.au>

The Modification History is also visible on the website of the developer of the Training Package: <http://www.nueitab.com.au>

Changes in units of competency and packaging of qualifications are reflected on the **National Training Information Service** which displays only current information:
<http://www.ntis.gov.au>
